PROFESSIONAL SUMMARY

Full-Stack Developer with **3+ years** of hands-on experience building production web applications end to end. Strong in backend development with **Laravel, CodeIgniter, FastAPI and MySQL**, designing RESTful APIs and payment integrations, with working experience in **Python and AI/LLM features** (biodata extraction and matching, OCR). Comfortable across the stack with Bootstrap, Material CSS, JavaScript, jQuery and React, and delivers secure, scalable systems aligned with business needs.

SKILLS

Languages & Frameworks: PHP (Core & OOP), Laravel, CodeIgniter 3 & 4, Python, FastAPI, JavaScript, jQuery, React

Frontend: HTML5, CSS3, Bootstrap, Material CSS

Database: MySQL — schema design, query optimization, indexing

APIs & Integrations: RESTful APIs, Payment Gateways (PhonePe, Razorpay), AI/LLM APIs (Groq, Gemini), OCR

Tools & Platforms: Git, GitHub, Postman, PHPUnit, Docker

Other: MVC Architecture, UI/UX Design, Agile Development, Cybersecurity (CTFs)

WORK EXPERIENCE

Full Stack Developer
June 2023 – Present

CodeX Technologies | Mumbai, India

- Developed and optimized RESTful APIs for authentication, wallet and reward points management, ensuring secure and scalable performance.
- Built a role-based admin and super admin system for Lotus Brand Bazaar, improving access control and operational security.
- Contributed frontend and backend API development across multiple matrimonial platforms (Pavitralagna, Blesslagna, Yogyanati, Marathisoyrik, Lagnachibedi).
- Designed and integrated payment gateway solutions (PhonePe, Razorpay), handling real-time financial transactions securely.
- Built AI/LLM-powered features with Python and FastAPI — biodata extraction, matching and OCR workflows.
- Developed CRM and banking-related applications with a high-performance, secure and scalable architecture.

FREELANCE PROJECTS

Business Management Web Application (Gold Loan System)
January 2025 – March 2025

Independent Projects

- Delivered a fully customized business management system for a freelance client, using CodeIgniter 4, MySQL and Bootstrap 5.
- Built and maintained APIs for profit & loss tracking, employee salary & borrowings, customer lending and gold loan management.
- Implemented dual-language support (Marathi & English), CSRF protection, real-time AJAX updates and PDF report generation.
- Designed and deployed the complete full-stack solution aligned with the client's business operations and reporting workflows.

CERTIFICATIONS

DROP Certified Security Course (DCSC)
Issued August 18, 2024

DROP Organization — Cyber Security & Ethical Hacking Training

Certificate No. DCSC-SMN1223. Web application penetration testing: security principles, ethical hacking and secure web practices, validated by examination.

EDUCATION

BCA — Bachelor of Computer Applications
June 2022 – May 2025
